

YAHAYA JAMIU

Full-Stack Developer

yahayajam32@gmail.com | 0815 153 8323 | Nigeria

GitHub: github.com/Yahaya-Jam32

PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Science undergraduate building modern, responsive web applications with HTML, CSS, JavaScript and TypeScript. Comfortable turning a real problem into a clear, working interface, with a growing focus on backend development (Node.js, Express, REST APIs and databases). Learns fast through hands-on building, structured coursework and continuous self-study, and is working toward becoming a well-rounded, production-capable Full-Stack Developer.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript

Backend (currently learning): Node.js, Express.js, REST APIs

Database (currently learning): MySQL, MongoDB

Tools: Git, GitHub, npm, Browser DevTools, VS Code

DEVELOPMENT JOURNEY

- Began learning to code in 2023 after gaining admission to university, building fundamentals in HTML, CSS and JavaScript through coursework, online platforms and YouTube tutorials.
- Progressed into structured JavaScript and TypeScript, focusing on building interfaces that are genuinely usable, not just functional.
- Currently expanding into backend development — Node.js, Express, and relational/NoSQL databases — to work end-to-end on full-stack applications.
- Builds and maintains a personal developer portfolio (DeNoble Tech) documenting real projects as they're completed.

EDUCATION

Confluence University of Science and Technology, Osara, Kogi State, Nigeria

B.Sc. Computer Science — in progress — Expected completion: 2027

Local Government Secondary School, Ohiana, Nigeria

Senior Secondary School Certificate (SSCE)
